“The Bombed Kaki Tree Jr.”

Name of the Tree

This tree is a sapling from the bombed kaki tree in Nagasaki and planted here by the
"Revive Time: Kaki Tree Project".
Day/Month/Year
The "Revive Time: Kaki Tree Project" Executive Committee

A kaki parent tree survived the 1945 atomic bombing despite being scorched half of its trunk.
Masayuki Ebinuma, an arborist, treated the tree years later and produced saplings.
We pass on messages conveyed by these saplings such as the power of life force
and resilience to children of the future.
Let's learn the importance of peace and preciousness of life while growing the sapling.
